One October night in 1971 a lone hiker disappeared.

His last known coordinates were
34°07'49.8"N, 117°47'41.6"W
based on a notebook belonging to him found undisturbed on a trailside bench next to drag marks that disappeared into the brush.

It is believed he was resting on the bench enjoying the breath-taking view when suddenly something or someone grabbed and dragged him deep into the mountains.

Till this day, no one knows what exactly happened to the lone hiker.

It is said that around this time every year the lone hiker reveals himself to other hikers that dare to sit on the bench he was last seen sitting on.
